Randolph Elementary School, Goochland, VA

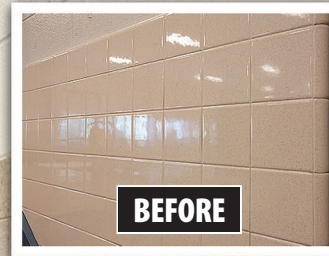

Cafeteria Walls Repaired and Refinished for Sanitary, Easy Maintenance

Goochland County
Public Schools

AFTER

AFTER

▲ Tile and cinderblock walls are returned to like-new condition and are now much easier to keep clean.

The Problem

After years of use, the school cafeteria's wall tile was cracked and chipped, and the grout was impossible to clean. The cafeteria also had a cinderblock wall covered with stained and dirty carpet. The germ-laden carpet could be taken down but a solution was needed for the cinderblock wall once the carpet was removed. Replacing the tile and cinderblock wall was not in the budget. Representatives of the Goochland County Schools Facilities Management and the school's Parent Teacher Association contacted Miracle Method for a budget-friendly solution that would also unify and brighten the cafeteria walls.

The Miracle Method Solution

Miracle Method of Richmond met with the PTA and the school's facility managers, presenting the durability and affordability of Miracle Method's surface refinishing. They would first remove the wall carpet and secure laminate sheeting over the rough cinderblock walls. The new laminate wall and the adjacent tile walls would then be refinished in the same Natural Accents[®] stone look color to provide an updated, consistent look for the cafeteria walls.

The Process

Miracle Method technicians removed the wall carpet and anchored laminate to the cinderblock walls. They then cleaned and repaired the tile walls; replaced the cracked tiles; and re-grouted as needed. The tile and now laminate wall were refinished with Miracle Method's Natural Accents stone-look finish and clear coated for lasting durability.

The Result

The job was completed on time and within budget. Students returned from summer break to a beautiful cafeteria. Compliments flowed from county management, teachers, students, parents and staff. Walls and tile grout lines that were once dirty and unsanitary are now much easier to clean and significantly more sanitary.
