CASE STUDY

The University of North Carolina at Chapel Hill

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Tile floors and walls – in 84 bathrooms – repaired and refinished, four weeks ahead of schedule.

▲ *Miracle Method's transformation of the UNC Residence Hall bathrooms.*

The Campus

The 50-year old Craige Residence Hall on the University of North Carolina campus..

The Problem

From dated tile to impossible to clean grout, this residence hall had 84 bathrooms in need of an update. Starting at the 2012 summer break the bathrooms had to be ready for students by August 18.

The Miracle Method Solution

Miracle Method demonstrated its ability to repair, seal and refinish tile to UNC's facility management without the mess, time and cost of traditional demolition and replacement. Miracle Method worked with other key contractors and developed an integrated time line to meet the tight deadline.

The Process

Plumbing contractors removed all bathroom fixtures before turning them over to Miracle Method. Tile repairs were made and surfaces cleaned using Miracle Method's two-step cleaning process. The cleaned and prepped tile was treated with MM-4 bonding agent and refinished in a two-tone Natural Accents[®] stone look finish, before being turned over to plumbers and electricians to install new fixtures and lighting.

The Result

Miracle Method finished their portion of the project four weeks ahead of schedule. Commenting about the remodel, Heather Robertson, incoming Resident Hall Association President says, "I think the most impressive transformation so far is the Craige bathrooms. Instead of outdated green tiles original to the building, the bathrooms now have modern off-white and brown tiles. This color scheme is clean and simple."
