University of Pennsylvania in Philadelphia

Miracle Method Updates Over 200 Bathrooms During Campus Breaks

The Problem

Tile floors, walls and shower pans in residence hall bathrooms at the University of Pennsylvania were outdated and dirty. The impossible to clean bathrooms lowered the image for the entire university. The Facility Manager was looking for an affordable solution to improve their appearance and restore bathrooms without disruption to students.

The Miracle Method Solution

After meeting with Miracle Method at an APPA Conference, the Facilities Manager arranged for a demonstration of the tile refinishing process. The refinished bathroom was tested for durability and ease of cleaning during a six month period. Refinishing was then selected over replacement to update over 200 bathrooms during upcoming vacation breaks.

The Process

Six Miracle Method technicians were on site at all times to complete batches of bathrooms, adhering to the schedule designated by the university over the students' breaks. Minor repairs were made to cracked tiles and grout lines were permanently sealed to inhibit the growth of mold and mildew. Tile floors and walls were then refinished using complimentary color

choices from Miracle Method's Natural Accents[®] stone-look finish line. The refinishing process gave the outdated tile walls, floors, and shower pans a clean, modern appearance.

The Result

Miracle Method's Refinishing process provided much needed upgrades to the University of Pennsylvania's bathrooms, while avoiding extensive removal and replacement costs. The refinished surfaces have proven to be easier to maintain with long lasting durability. Miracle Method was able to save the university time and mitigate disruption by completing the work over summer and winter breaks. As a result of the beautiful renovations, students and families visiting the college were impressed with the updated bathrooms and the overall appearance.
