### Miracle Method Provides Affordable Solution to Update Over 300 Residence Hall Restrooms

BEFORE

AFTER

BEFORE

AFTER

#### The Problem

Outdated, worn and damaged tile walls, bathtubs and showers in residence halls were in desperate need of an upgrade. Traditional replacement options could not be completed in the short time in which students were on summer break and would have required housing students at an off-site location at significant costs. The status quo of upgrading only a few units at a time to avoid these issues was not meeting the facility's quality standards.

#### The Miracle Method Solution

After careful evaluation of refinishing as a solution, the Director of Housing Facilities and Operations requested approval for Miracle Method's surface refinishing process to revitalize residence hall bathrooms. The durability, cost savings and ability to complete all bathrooms during summer break combined with Miracle Method's extensive experience at several colleges and universities won the approval of the university. Refinishing was the optimal choice to complete the work on a tight timeline, within budget and without the hassle of removal and replacement

#### The Process

In order to renovate the 309 residence hall bathrooms during summer break, Miracle Method utilized commercial teams from multiple certified franchise locations. With experienced project

managers and assigned on-site lead technicians, Miracle Method was able to manage the large volume of refinishing work with ease. Using a proven refinishing process, 57,449 square feet of tile surfaces was repaired and refinished in just under twelve weeks.

#### The Result

The dated bathrooms were given a modern, durable and attractive upgrade using Miracle Method's Natural Accents<sup>®</sup> stone-look finish. While avoiding significant disruption and the temporary displacement of students, the refinishing upgrade came in under budget and ahead of schedule. Impressed by the efficiency, beauty and the successful management of the project, the University of Central Missouri plans to further utilize Miracle Method for additional refinishing projects.
