## University of Colorado at Boulder

# High-Profile Building Required an Affordable Solution to Upgrade Tile Bathrooms Over a Weekend

### The Problem

Two public restrooms in CU Boulder's Chancellor Building were in need of refurbishment. Tile walls and floors were dingy and showed their decades of use. Unfortunately, removal and replacement of the tile would be costly and would disrupt the Chancellor Building's Monday through Friday workweek.

### The Miracle Method Solution

The Associate Director of Facilities Operations had learned about Miracle Method at national and regional APPA conferences. When the request to upgrade the restrooms was made, she called on Miracle Method for its time and cost saving process to refinish tile. To complete the job over a weekend, coordination between the university facilities department and Miracle Method would be critical.

### The Process

At the close of business late Friday afternoon, CU facilities personnel removed plumbing and wall fixtures. Miracle Method technicians then cleaned the tile surfaces, repaired cracked tiles and filled in missing grout. They next applied MM-4, the

company's proprietary bonding agent, before refinishing the tile in the company's Natural Accents<sup>®</sup> stone look finish. Lastly, a clear coating was applied to provide durable and easy to maintain surfaces. Early Monday morning, CU facilities personnel re-installed fixtures, returning the restrooms to service.

### The Result

The beautiful, weekend transformation is in keeping with the status of the Chancellor Building and provided a timesaving and budget friendly alternative to removal and replacement. Miracle Method is now an authorized University of Colorado vendor and is actively working on other Boulder campus projects.
