

February 10, 2016

To Whom It May Concern,

I write this letter in recommendation of the Carey Construction Group and William Carey. Third Federal Savings & Loan has had the pleasure of working with Carey Construction Group on several projects since 2012. These projects include "in-line" shopping center build-outs in new facilities and renovations of existing property. Currently Mr. Carey and Carey Construction Group are constructing a free-standing building for Third Federal in Mayfield Hts. Ohio. The Mayfield Hts. project is a complete re-development of a property that our bank purchased. Even with the challenges of construction during our winter season Carey Construction Group is performing at a very high level and providing satisfaction to our facilities team and members of senior management.

Throughout the course of these projects Mr. Carey and the Carey Construction Group have performed as consummate professionals in all aspects of the work that we have contracted them to perform for us. Carey Construction Group has a unique ability to maintain top rate record keeping and always provides more than enough management and information to us on the client side. Carey Construction Group has a unique ability to manage their sub-contractors – something that, in my opinion, is critical to a successful project.

In addition to the previous stated qualities Carey Construction Group has always managed to keep our projects on time and on budget something that is very important to us in maintaining our "speed to market" and our fiscal responsibilities to our institution and our customers.

Sincerely,

Aaron Krumhansl  
Facility Manager
