Re: PSC Center for Public Safety
Letter of Appreciation

Mr. Tappouni:

As we complete this high profile project, I wanted to take an opportunity to express my sincere appreciation of a job well done!

Working with your crew has been a pleasurable experience. The quality and attention to detail have been a large part of this projects success. We have seen many challenges on this project and have resolved all of them through your team's cooperative efforts.

There are several people who have shown a great deal of patience and assistance to our staff.

James Tapley has demonstrated his ability to manage the project from both the field and the office. He has kept the paperwork current, provided options to solve design issues and owner expectations and maintain an adequate crew to get the work completed on schedule.

Bobby Dupre, Don Vanderpool, Don Pendley and Richard Kinhley (Massey Metals) are in our opinion four of the top professionals in their field. I do not believe I have ever worked with anyone in the construction industry with more integrity and professionalism than these gentlemen have displayed during this demanding project. Their knowledge of construction, ability to manage all aspects of your scope and their commitment to safety was a welcome addition to the project team. Their willingness to make sure that the work is done correctly and to the satisfaction of both A.D. Morgan and the owner – and to do it with sincerity – is something that is not typically found in the trades today.

If this team is the standard in which your whole company is based, then you should be very proud of your organization. I look forward to the opportunity of working with Tappouni Mechanical and Massey Metals again in the near future.

Sincerely,
A.D. MORGAN, CORP.

Michael Huff
Senior Project Manager

Frank Rebecky
Vice President of Field Operations
