Letter of Appreciation – FPU IST Project

Mr. Mike Tappouni,

Florida Polytechnic University, Florida's new 12th University, located right off of I-4, has been waking up each day and going to sleep each night for over six months, climatically controlled, as designed, without any complaints from the students or teachers. What an accomplishment!

Tappouni Mechanical should be extremely proud to have competed and awarded every aspect and every element of the HVAC mechanical for the campus. The central energy plant, all of the underground chilled water supply and return, distribution piping, chillers, cooling tower, air handlers, controls – all executed to perfection.

It is an amazing accomplishment that you and your company should be proud of. From the Skanska's management team, as well as me personally, we are grateful for your team's craftsmanship, attention to detail, and most of all, your company's positive attitude through all the trials and tribulations. We couldn't ask anything more of a subcontractor than what you provided for the project, and what was provided to our team.

Can't wait till our next project together!

Thank you,

Chuck Jablon, Skanska USA Building
Operations Vice President
