RE: Letter of Recommendation
Johns Hopkins All Children's Research & Education Facility

Dear Mike:

The Johns Hopkins All Children's Research and Education Facility in downtown St. Petersburg is a transformative building that will be instrumental in saving children's lives, and Tappouni Mechanical was a key partner in delivering this magnificent facility.

Tappouni started early in the process by providing valuable assistance in the pre-construction phase. By ultimately providing the most competitive proposal, Tappouni went on to perform the HVAC work for the project.

Due to the complicated nature of the Johns Hopkins All Childrens facility, Mike Tappouni spent a good deal of his time offering his expertise when needed. Because of this hands-on commitment, Tappouni Mechanical was able to deliver a quality product.

On behalf of my team, I thank you for a job well done and look forward to working with Tappouni Mechanical again on our next project.

Sincerely,

Skanska USA Building Inc.

Mark McLaughlin
Project Executive
