

# City of Lancaster

DEPARTMENT OF PUBLIC WORKS  
BUREAU OF ENGINEERING

December 3, 2012

To Whom It May Concern—

I write this letter in recommendation of Horst Excavating of Lancaster, PA as a construction contractor.

Horst has successfully completed multiple significant public works projects for the City of Lancaster in the past several years. Projects successfully completed include utility infrastructure (water and sewer projects, including pump station work), intersection and roadway improvements, park renovations, green infrastructure and stormwater improvements, and other projects of varying complexity and scope.

In addition to public works projects, Horst Excavating has successfully completed multiple large-scale private projects, such as land development and earthwork projects within the City of Lancaster's jurisdiction.

Horst Excavating always makes it a top priority to maintain safe work zones. Their employees are courteous to the general public, and they always strive to accommodate citizens and visitors during the inconvenience of construction, which is particularly important to us in a tight urban setting. Horst Excavating has stellar customer service and I would recommend them to other entities considering Horst Excavating for future construction projects.

Sincerely,

Matthew R. Metzler  
Capital Improvement Program Manager
