RE: Remodel, Renovation and New Construction of Robert E. Lee High School No. 33
Job No. 201011 Contract Value: \$1,292,000.00

Dear Les:

I want to thank Holman, Inc. for another successful project on the Remodel, Renovation and New Construction of Robert E. Lee High School No. 33 in 2012. This was the largest project that Ajax Building Corporation has completed with Holman and I appreciated your continued excellent service. You brought a vast knowledge of carpentry and specialty skills to the project that greatly helped the project run smoothly. You effectively restored the floor joists blending the necessary new floor joists with the structurally intact old floor joists. You also did an exemplary job repairing the window jambs and sills with structural grout. As always your field staff worked seamlessly with our other trades to install our bathroom partitions and accessories.

Your office staff is always pleasant and very responsive. As a Project Manager that makes my job easier. This was a very difficult and stressful project, but Holman did their best to help ease things along with timely submittals and change requests.

Based on all of my dealings with Holman, Inc., I believe that you will remain a long time regular subcontractor and partner of Ajax. I definitely look forward to using Holman, Inc. again on my next project.

Sincerely,

AJAX BUILDING CORPORATION

Mark Kraft
Project Manager
