

Mainstay Engineering Group

Construction Special Inspection Services

Mainstay Engineering Group has provided outstanding civil and structural engineering design services for years. Now we also provide that same expertise throughout the construction process. Mainstay's International Code Council (ICC) certified special inspectors provide owners, architects and developers the peace of mind that your plans are being followed and your project is built to the correct specifications. Mainstay provides special inspection and testing services across several critical aspects of the construction process, including:

ICC Certified Reinforced Concrete Special Inspection:

- ✓ Formwork installation
- ✓ Reinforcement sizing, spacing, embedment and cover
- ✓ Sample and field testing of freshly mixed concrete
- ✓ Conveying, placing, consolidating, finishing and jointing
- ✓ Curing, protection, formwork removal
- ✓ Verification of compliance with plans, specifications, codes
- ✓ Evaluation of reinforced concrete construction in the field
- ✓ Documentation and reporting inspection results
