

Mainstay Engineering Group

Construction Special Inspection Services

Mainstay Engineering Group has provided outstanding civil and structural engineering design services for years. Now we also provide that same expertise throughout the construction process. Mainstay's International Code Council (ICC) certified special inspectors provide owners, architects and developers the peace of mind that your plans are being followed and your project is built to the correct specifications. Mainstay provides special inspection and testing services across several critical aspects of the construction process, including:

ICC Certified Reinforced Masonry Special Inspection:

- ✓ Verification of masonry material properties
- ✓ Location, placement, size, grade and type of reinforcement, connectors, anchorage
- ✓ Proportions of site-prepared mortar and grout
- ✓ Conveying, placing, consolidation of grout
- ✓ Preparation, construction, protection of masonry regarding weather conditions
- ✓ Verification of compliance with plans, specifications, codes
- ✓ Evaluation of reinforced masonry construction in the field
- ✓ Documentation and reporting inspection results
