

## Mainstay Engineering Group

## Construction Special Inspection Services

Mainstay Engineering Group has provided outstanding civil and structural engineering design services for years. Now we also provide that same expertise throughout the construction process. Mainstay's International Code Council (ICC) certified special inspectors provide owners, architects and developers the peace of mind that your plans are being followed and your project is built to the correct specifications. Mainstay provides special inspection and testing services across several critical aspects of the construction process, including:

### ICC Certified Special Soil Inspection:

- ✓ Footing sub-grade inspection and verification
- ✓ Excavation inspection and verification
- ✓ Classification and field testing of controlled fill materials
- ✓ Inspection of soils, densities and lift thickness during placement and compaction
- ✓ Sub-grade preparation inspection
- ✓ Documentation and reporting inspection and field testing results
