

Mainstay Engineering Group

Construction Special Inspection Services

Mainstay Engineering Group has provided outstanding civil and structural engineering design services for years. Now we also provide that same expertise throughout the construction process. Mainstay's International Code Council (ICC) certified special inspectors provide owners, architects and developers the peace of mind that your plans are being followed and your project is built to the correct specifications. Mainstay provides special inspection services across several critical aspects of the construction process, including:

ICC Certified Special Structural Steel & Bolting Inspector:

- ✓ Structural steel material verification
- ✓ High strength bolting material verification
- ✓ Steel framing and joint detail inspection for construction document compliance
- ✓ Documentation and reporting inspection and verification results
