

## Letter of Recommendation

To whom it may concern,

We have been working with GM Monarch West for over four years here at the Cosmopolitan Resort.

Their scope of work here was all trim, kitchens, and vanities for approximately 3,000 rooms. The work that they did for us was of excellent quality, and met every schedule milestone. This work was distributed over two towers, and work proceeded at essentially a floor a week for each type of work being produced and installed. We are very proud of the final product.

In addition to the two towers, GM Monarch West also did the majority of work on our pool decks, floors 4, 4.5 and 6. This scope of work included the bars, service stations, faux exterior GFRG wood cladding of walls and ceilings, as well as faux GFRG cladding of our cabanas. This work, being on pool decks and outdoors is extreme in its use and in its everyday environment. The products GM Monarch used are made especially for outdoors and wet areas and looks excellent. At this point we have seen little or no degradation due to the environment this millwork is in.

Based on our recent experience with both the towers and the Recreation Deck millwork from GM Monarch West, we can highly recommend them for similar types of millwork applications. GM Monarch West delivers a quality product, on time, and one you can be proud of.

Yours truly,

**Chris Johnson**
