To whom it may concern:

I am very pleased to write Bansal Construction a letter of recommendation. I would like to recommend Bansal Construction for all work associated with airfield lighting including FAA modifications and new construction.

Hi-Way Paving, Inc. has worked with Bansal Construction on several projects over the past several years, most recently in 2012-2013 at the Cincinnati-Northern Kentucky International Airport on a \$31 Million rehabilitation project. This project was not only very challenging with utilizing new and existing infrastructure, but also had a very demanding schedule. Bansal Construction was focused on the project and were able to accommodate the ever changing paving schedule. Hi-Way Paving and Bansal Construction worked together as a team during this project and we were able to complete on time and on budget. From the very top of the corporation, to the onsite crews, everyone within the Bansal organization assisted Hi-Way Paving in making this project a great success. I look forward to working with Bansal Construction in the very near future.

Very Truly Yours,

Mindy DeCarolis
