

Testimonials

Discovering that we had toxic mold in our home was frightening, and could have been potentially devastating. Benchmark moved quickly to give us exact information, as soon as possible, making it easier for us to move forward with the clean-up and reconstruction.

Fritzi and David Marston - Homeowner

Congratulations on your recent award as one of the Top 60 Women Owned Business in Silicon Valley. Your business success is a true accomplishment. In our current economy, your achievement speaks not only to the quality of your company, but it is also a tribute to your steadfast vision, fortitude and hard work.

Jackie Speiers - Former State Senator - District 8

Benchmark is presently under a two-year contract with the SFHA to provide hazardous materials support. Benchmark is a very responsive company and is considered a valued consultant to the San Francisco Housing Authority.

James Mark, AIA - Senior Project Manager - SFHA

I would like to acknowledge the lead-based inspection services Benchmark has provided our department since September 2006. As we begin the New Year I wanted you to know that the cooperation and working relationship we have established is very much appreciated and we are looking forward to working with you and your staff.

Frank Ballow - Housing Construction Office - San Diego Housing Commission

The city of Santa Clara, Housing and Community Services is pleased to recommend the services of Benchmark Environmental. Benchmark Environmental under the direction of Wendy Buller has provided me with courteous excellent, timely professional and knowledgeable services. I highly recommend Benchmark for your company or governments jurisdiction.

Kelvin Malko - Housing Inspection - City of Santa Clara

For more than 10 years, I have had the pleasure of working with Benchmark Environmental Engineering on several projects related to indoor air quality throughout the San Francisco Bay Area. Typically, these projects include asbestos, lead, and/mold sampling and recommendation writing. However, many of the projects have involved unique challenges, such as -aldehyde sampling and data interpretation, deodorization techniques for severe odor contamination and expert consultation for contents remediation.

On a typical project, one of Benchmark's highly trained staff comes to the location, meets with the building owner, tenant(s) and/or restoration contractor, collects all of the pertinent data, assesses and reviews the history, needs and requirements of the project and any pertinent paperwork. After carefully examining the details of the project, they keep me informed throughout the review period and write an easy-to-read report of their findings.

I appreciate Bryan, Wendy and their entire staff. Rob, Gerrardo, and Terri all have excellent communication skills and attention to detail. They return my calls and email correspondences quickly and at all hours of the day. Through Christine and Julie, their office staff is also attentive to my needs and responsive to my inquiries. I would not hesitate to recommend Benchmark Environmental Engineering on any restoration or remediation evaluation project.

Bill Weber, CR, CMRS, CBST, GRP - Regional Manager - Anderson Group International - Restoration and Remediation Contractor
