Re: Certification as an Approved Fabricator for the City of Richmond

Dear Alona Nolten:

Having successfully completed the certification requirements, this letter confirms that Metal Supply Inc. – South Gate, CA plant is certified as an “Approved Fabricator” in the category of Structural Steel Fabrication by the City of Richmond.

Approval is subject to the following conditions:

1. In lieu of special inspector's reports, a Certificate of Compliance (COC) must accompany all fabricated steel structures to be constructed in the City of Richmond, stating that all work was done in accordance with the approved construction documents. In addition to the COC, please reference all structural steel per City-approved drawings in the COC (Shop drawings may be submitted as reference). Please note that all revisions/changes to City-approved construction documents must be submitted to the City of Richmond for approval.
2. Records of material traceability as well as records of performed inspections as required by the construction documents or referenced standards shall be available upon request.
3. Copies of the current California Building Code and applicable standards shall be available to the fabrication and quality control personnel at the facility at all times.

This approval is based on your latest AISC Certificate # 209051061-2015 and the certification is valid through August, 2015. If you wish to continue the certification, please submit a renewal request letter and documentation of a successful audit.

Sincerely,

George Kabaivanov, P.E.
