5/5/16

Andy,

Allow me a moment to comment on Accurate Electric's performance through out the construction of our new I HOP Restaurant.

I'll begin at the end.

You dispatched Central Florida Infrastructure to help us through a required PIV monitoring that I failed to coordinate. This was an emergency considering building occupancy was eminent. These three individual's were steadfast, incredibly hard working and focused on our need. They provided the conduit between the PIV and alarm panel as promised in one day. The conductor was pulled, terminated and inspected by the FD flawlessly.

The beginning was a pleasant introduction to you and your site Superintendent, Joe. As the first rough was underway, building wall width, main gear location and coordination, POS slab penetrations etc. were presented to me for comment and research with the Engineers. All suggestions were given a green light and these changes are now revisions for further I HOP ground up's.

The second rough coordination and installation by Accurate, while fielding Owner input and changes was seamless. The trim / completion phases clearly indicate the diligence demonstrated through out the entire duration of our project. The end result of the fixture locations etc. is excellent.

Accurate Electric's relationship's with the County, Duke Energy and Vendors clearly helped expedite everything associated with this project.

Please pass on my thanks to Joe, Moe, Chris, Ron and others I may not have included.

Hell of a job,  
Thank you Andy

Sincerely,  
Brad Morgan
