LETTER OF RECOMMENDATION

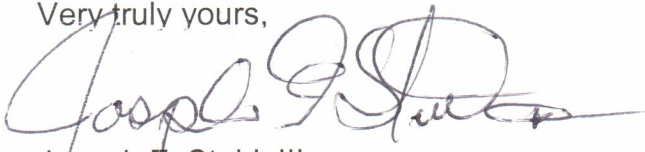

Project: U. S. Postal Service – South Florida Process and Distribution Center (P&DC) – Workroom and Dock Air Conditioning Upgrades
City of Pembroke Pines, Florida

To Whom This May Concern,

Please accept this letter as a recommendation from Stuhl Engineering Consultants, Inc. (SEC) for the efforts put forward by Mr. Mauricio Correa and Sunshine State Air Conditioning, Inc. (SSAC) with their part of the above referenced project. Mr. Correa and his staff provided exceptional quality in their workmanship, but they also provided a level of personal contact and respectfulness which is very uncommon in this industry. It should also be noted SSAC went beyond what was expected and gave their best effort to complete this project, in spite of numerous obstacles.

I am very proud to have made friends with Mr. Correa and his team, and I thank them for their part in helping to complete this project. It took a lot of work on everyone's part to make this project a success. It is my pleasure to recommend that you give serious consideration to using SSAC on your future projects. For my part, I wrote a letter of recommendation to the Mr. Jerry Goddard, Manager FSO, United States Postal Service suggesting that they give SSAC future projects based on their performance.

Very truly yours,

Joseph F. Stuhl, III
President
