To Whom It May Concern:

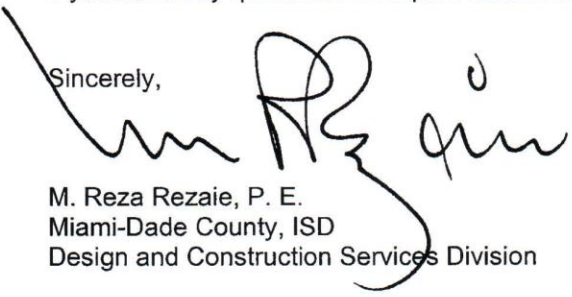

I have worked with Sunshine State Air Conditioning, Inc. and its principal Mr. Mauricio Correa in a few projects as recent as six months ago for the replacement of two 800 ton Cooling Towers project in Miami-Dade County Data Processing Center. I was the Engineer of Record, the Project Manager and Construction Manager for the project. This project was very sensitive and challenging in nature due to the fact that the building is in operation 24/7 and houses Police, Fire and 911 operations. Their workmanship quality and expertise has been a fundamental part for the successful completion of this project.

I recommend Sunshine State Air Conditioning, Inc. as a reliable and professional Mechanical Contractor. They have provided us with professional and efficient service. Their field staff and management team performs beyond the call of duty to meet or exceed the project schedule and client expectations.

The promptness and completeness of their pre-construction meetings and collecting documents have facilitated the construction process. I can highly recommend them and personally look forward to working with them on many future projects.

If you have any questions or require additional information, please contact me accordingly.

Sincerely,

M. Reza Rezaie, P. E.
