To whom it may concern:

Delta Sonic Car Wash Systems has been working with E.GSI Skylights for many years on different projects located in the WNY and CNY areas. Is most recent project in West Seneca NY which involved three separate skylight features on one of our properties? The team at E.GSI worked with us throughout the project to keep everything on schedule and to make sure the installation went smooth. I work for a company that has locations in three different states and use vendors from all around the United States and realize the logistics of working with companies that aren't local can be difficult. I have no issues recommending E.GSI Skylights as a good company to work with regardless of where your project is located I have full faith that they will do everything within their powers to accommodate to your company's needs.

Regards,

Daniel DePriest
