October 10, 2019

I would highly recommend Buck Services, Inc. for your organization. A situation arose where we needed to procure immediate cleaning services for our 84,000 square foot athletic center. Management staff at Buck met with us the next day and staffed a daily crew so that we did not experience any break in janitorial care for our facility. Management staff worked beside the crew during training and quickly restored our facility to the high level of cleanliness we were looking for. Their cleaning staff provided exceptional service that our participants noticed and commented on. Staff was dependable and consistent delivering everything we asked for along with many extra services when they noticed neglected areas. Management staff checked in and stopped by weekly to ensure that we were happy with the service being provided.

Buck Services management and staff are true professionals that exemplify a high work ethic. They are people to be trusted. The Buck Service team is a quality organization that takes pride in making your facility look great.

Please feel free to contact me should you have any additional questions.
