Attn: Mr. Bill Boswell

Re: *Testimonial Letter*

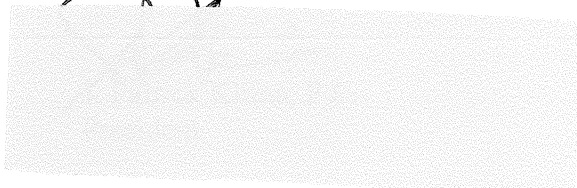

Dear Bill:

Geo-Technology Associates, Inc. (GTA) is providing this letter as a testimonial to the specialty contracting work of Mark-Lang, Inc. (Mark-Lang). GTA, as a company, and I personally have worked with Messrs. Bill and Chuck Boswell of Mark-Lang and their crews for the better part of two decades. Specialty construction services provided by Mark-Lang during this time include modification of roadway subgrade soils with cement, quicklime, or other pozzolanic materials; construction of soil cement base courses; full-depth reclamation of asphalt roads or parking lots; and drying of soils by means of chemical additives.

Mark-Lang and GTA have specifically worked together on a number of projects where quicklime was utilized to stabilize roadway subgrades. I have always found Mark-Lang representatives to be knowledgeable and professional with respect to the process of stabilizing soils with quicklime. Their equipment has always proven to be within the standard of care with respect to modernization and reliability. Many times, we are working under tight deadlines with significant regulatory oversight. I cannot recall an instance when a problem arose which was not able to be resolved to the satisfaction of GTA and the regulators.

In summary, I have nearly always found working with Mark-Lang to be a positive experience. I do not hesitate in recommending them to my clients on our projects.

Sincerely,
GEO-TECHNOLOGY ASSOCIATES, INC.
