RE: Medina Services

When it comes to my glass and glazing needs, Medina Services is my go to subcontractor. I have been doing business with Andy and his team for years and he never lets me down. This past year was a prime example. One of my biggest clients gave us four major renovations, two of which had both interior and exterior glass and glazing. All of them had the same start and end date. The schedule was tight on all four projects and of course Medina Services came through on all four projects.

Andy has saved me several times by jumping through hoops at the very last minute on several small issues, but were big issues to my clients. Medina Services always comes through whether it is a door closer that needs adjusting or a whole new storefront system and the job is finished with top notch quality.
