To Whom It May Concern:

Native Tele-Data Solutions provided the structured cable work for the New Medical Office Building at the Winslow Indian Health Care Center as a subcontractor to Keyah Construction Inc. This 35,500 square foot facility contained two Communications Rooms and over 130 computers when it opened in August, 2014.

NTDS worked closely with our team from the start of conceptual design through completion, move-in and close out. They provided early budgets that held up through the entire project. Their work in the field was excellent and we had no problems with the network when the building opened.

We would enjoy working with NTDS on future projects.

Sincerely,

Doug Harrower  
Operations Manager
