Re: PDQ Enterprises

I was nearly sick with worry about my home and its sinking corner of the garage. I was referred to PDQ, as well as two other companies.

Chuck was by far the most knowledgeable and the kindest person I spoke with. He thoroughly inspected my home, including other areas where I had concerns and needed an opinion. He reassured me that he could fix my home and not bankrupt me in the process! He alleviated my worries. He was my savior!

He and his work crew arrived on time, were professional in every way, installed a Helical Pier and cleaned up the job site when they were finished. I hope I never have to use them again, but I know they'll be there for me if I ever do need them.

I highly recommend PDQ for anyone who has a problem with their home. You won't regret calling them.
