

Visionscapes Land Design has been a trusted vendor of mine for over 10 years. Shawn Anderson who is the President has a great knowledge of landscape materials, the environments that he is working in and matching them with the vision the client has and their budget. The projects we have worked on have consisted of \$500,000 overhauls that have been phased in over a few years to upgrades designed for maximum leasing, existing tenant satisfaction and value to owners for upcoming property sales.

Shawn has the highest integrity and the quality of his projects are second to none. I would highly recommend Shawn to look at any landscape design and installation project.
