Tom,  
I want to take an opportunity to compliment your curb crew that was on the Kramer job site yesterday. They were extremely professional and courteous. When they arrived on the site everybody knew what to do and they got to it. No issue was a problem. They just said we'll take care of it, and they did. I asked to have a couple dowels put in where the standing curd met the turndown curb--no problem. I thought that I saw a small dip on the top of the curb near where they were waiting for the next concrete truck--- no problem. They checked with their mag then brought over a shovel full and rubbed it in--- no problem. There were 2 places where the construction fence needed to be moved out of the way for curb machine clearance. At the end of the day about 3 or 4 of the guys helped me to reconfigure the fence to accommodate the curb---no problem. I hope that I get the opportunity to work with your guy again. You should be proud that they represent you company very well. Job well done!

Thank you,  
Tim Crowley
