To Whom It May Concern,

I would like to recommend Keith Turley as a very qualified plumber who takes pride in his work and always strives for excellence.

Three years ago I opened my own General Construction business and have used Mr. Turley on many of my projects. He has done jobs as small as replacing a water softener to as large as doing all the rough in and finish plumbing for a five million dollar commercial job. Mr. Turley always gives great service even when called at the last minute for an emergency job.

On my custom homes Mr. Turley has proven that he not only provides excellent workmanship but can be counted on to work hand in hand with the customer and the General Contractor to complete a project that is aesthetically pleasing and provides the best functionality at the best price.

I came to know Mr. Turley's work when I was employed with another company, America's Contracting Service (ACS), as a project manager. In the two years I worked with ACS I hired Mr. Turley and his company, Frontline Mechanical, to complete the plumbing and HVAC on several of my projects. His work was always finished in the time schedule allotted to him and the quality of his plumbing was always to the good standard we have come to expect from him.

Please feel free to call if you have any questions or need any further information on Mr. Turley or Frontline Mechanical.

Thank you,
Richard Muller
