Mr. Gail Johnson,
Acousti Engineering Company of Florida
4656 Southwest 34th Street
Orlando, Florida 32811

**RE: Verizon Wireless MSC Orlando
Orlando, Florida**

Dear Mr. Johnson,

The above referenced project has been turned over to a very satisfied Owner. We have been commended by them and the Architect for our efforts on this important project that is one of the largest new switches constructed by Verizon Wireless in the southeast. We would like to express our gratitude for the efforts of those at Acousti Engineering Company of Florida who helped make this project a success. The drywall and ceiling work was executed quickly and to a high level of quality which we strive for on each and every project we build. Matt Scott was the superintendent on this project towards completion and was able to push through in the end. He was attentive to details and completed all of the loose ends at a critical stage in the project. Pete Kushmick was the project manager and performed equally well with his duties.

During a recent walk through with several Verizon Wireless managers and corporate representatives, it was obvious that they were impressed with the overall quality of the building and very satisfied that the switch is operating smoothly. Acousti Engineering Company of Florida played a major role in this project and allowed us to exceed their expectations.

We again appreciate your efforts and look forward to working with your company in the near future.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Isbell', is written over a light blue horizontal line.

Jeremy Isbell
