

# Mouw Associates, Inc.

January 5, 2010

To Whom It May Concern:

Mouw Associates, Inc. has just completed the final phase of a three year project for Bethesda Memorial Hospital in Boynton Beach, Florida.

The completion of this final phase also now completes the entire multi-project contract which consisted of the Bethesda Comprehensive Heart Center, Bethesda Surgery Expansion and Renovation, Endovascular O.R., Neonatal Intensive Care Unit, and the Central Utilities Plant Expansion all consisting of more than 190,000 sq ft with a construction value exceeding \$65,000,000.00.

The success of most projects largely has to do with the quality of the entire "team". Acousti Engineering of West Palm Beach was a key team member, responsible for the Acoustical Ceilings, Vinyl and Ceramic Tile throughout the projects. Acousti's ability to respond to the daily demands of the schedule, quality control of their products and the cooperation within the entire "team" greatly added to the overall success of the Bethesda Memorial Hospital Projects.

We would definitely look forward to many future projects with Acousti and would recommend them without hesitation.

MOUW ASSOCIATES, INC.
