To whom it may concern:

We are pleased to recommend Priority Design & Service. As HVAC subcontractor on our latest project, Urban Crest Apartments, we found their team to be dedicated partners in our efforts to provide a quality product while maintaining strict deadlines. They staff our site with knowledgeable installers and competent field supervisors. Their attention to detail, construction processes and quality management sets them apart from many others in their field.

They always have a solution for any problem we present them with. They take a very active role in daily coordination with our field representatives and other trades in an all-around effort to ensure production stages are completed correctly and on time.

We would be pleased to have Priority Design & Service on our future projects. We are confident that you will feel the same.

Sincerely,

Joseph S. Bakke,
President
