### GBA ARCHITECTURAL PRODUCTS + SERVICES – TESTIMONIAL

Rad & D'Aprile, Inc. has been doing masonry work for themselves for over forty years. When we were approached by GBA ARCHITECTURAL PRODUCTS + SERVICES to install our glass block work on an SCA project, I met it with skepticism. Why would we want to sub out our work to another subcontractor?

When we discussed cost, I thought they would exceed our budget. I was wrong; we saved time and we had less headaches.

As a specialized mason, GBA was more knowledgeable and more professional in that genre of masonry than anyone else. Their staff was very professional and provided all required information in a timely fashion. The quality of work exceeded our expectations! They coordinated well in the field with the GC and our foreman.

I would highly recommend GBA to anyone looking for quality and professional services for glass block installation.
