

"We've worked with Buffalo for about 5 years now and since then, they have been our 'go-to' contractor for everything mechanical. The office staff and field crews are professional and courteous. These guys really know their trade. All work is done neatly and on time. As a general contractor, you need to have faith that your subs will perform; Buffalo has always come through for us. From new construction unit sets and duct installs to thermostat repairs, air balancing and service work and repairs – Buffalo's is truly a one-stop shop for your mechanical needs."
