To Whom It May Concern:

We are 14 separate property owners who live on a private roadway for which we share equal responsibility for its maintenance and upkeep. Property owners include on site residents as well as absentee participants from California and China. In mid-summer of 2017, a number of paving companies were asked to submit cost proposals for repairing existing problem areas and providing a new asphalt overlay of the entire road surface. Subsequent to receiving proposals, two contractors were invited to review a final scope of work and the responsibilities of each contract party to assure a smooth execution of the project. The contractors then submitted their final proposals. From this process, a clear choice of contractor became evident and thus began a very satisfactory association with the Lakeridge Paving Company and Bill Wallace. Unfortunately, by the time we reached this point, the 2017 paving season was over.

During the ensuing off season period, Bill met with our city utility department and coordinated required interfacing, attended meetings with residents to discuss their concerns and requests which, in some cases, fell just short of guaranteeing world peace. His calm demeanor, competence and willingness to facilitate others schedules paved the way to putting all parties at ease.

As the 2018 paving season arrived, Bill was able to hold our place in a very busy Lakeridge work schedule. The project was completed as planned and was accomplished by very competent and professional people in every facet of the company's business. From the workmen on site to the office personnel, all were most pleasant, efficient and accommodating to work with.

There is no doubt in our mind that you will be very pleased with your decision to contract with the Lakeridge Paving Company on your next project. We would wish you good luck, but that will be assured with your decision.

Very truly yours,

The 59th Street Gang
