## INSPECTOR STEVE DEAL DEAL'S CONSULTING INCORPORATED

Throughout the 34 years I have worked in high-rise and low-rise buildings, Curtis Carsey has demonstrated to me to be one of the most knowledgeable in the fire alarm industry in fire/life safety codes and systems.

Knowing Curtis for over 20 years, he has never failed to explain the very complicated areas of the fire and life safety systems requirements.

His knowledge of current fire codes specific to each type of occupancy in the City of Houston makes him one of the best in the industry.

It's important to share with you what our clients are saying, as they know our work.

Our clients turn to us for fire alarm systems, extinguishers, access controls, electronic locks, CCTV/surveillance cameras, digital video recording and UL monitoring.

## STEPHEN LLOYD, SENIOR CHIEF ENGINEER TRANSWESTERN COMMERCIAL SERVICES

I have conducted business with Curtis Carsey for over 20 years. I have observed his work ethics when he started out as a service technician at another fire protection company to see what he has become as the owner of one of the best fire life safety / security companies in Houston.

Professionally, Curtis is very knowledgeable and stays abreast of new equipment and codes as they relate to life safety systems. Curtis has always been able to answer any and all questions I have asked in regards to fire/life safety code requirements.

Through Classic Protection Systems continuing education, they have provided me with a staff of well trained, experienced technicians that can maintain and troubleshoot the new addressable fire systems as well as the older hard wired systems.

I would recommend Classic Protection Systems to anyone who is looking for a qualified, dependable and experienced fire alarm/security company.

## EXPERIENCED AND LICENSED

We do pride ourselves in accomplishing the technical process and expertise achieving this UL accreditation for our installations. Classic has gone through the intense training to become a recognized UL Listed Installer of fire alarm systems.

Our technicians are experienced with fire alarm systems by Gamewell-FCI, Notifier, EST, Fire-Lite, Silent Knight, FCI (Fire Control Instruments), Ademco, Vigilant, Honeywell, among others.

Classic Protection Systems, Inc. and all technical personnel are licensed by the State of Texas for fire alarm, intrusion systems, cameras, digital video recording systems, access control, electronic locks and ID badging systems.
