December 19, 2013

To Whom It May Concern,

After working very closely with Bob Watson and his team at Fountain Technologies over the course of the last year, we would like to recommend them for any fountain design, construction or maintenance you may be seeking.

Fountain Tech has many skilled employees from tradesmen to office staff, and it is very clear they are passionate about delivering the best fountain system possible. Bob Watson is very knowledgeable when it comes to fountain systems and it is clear he has dedicated his life to the industry. They will go the extra mile to make sure everyone involved is satisfied with the end product and they are easy to work with and very responsive throughout the entire construction process.

We are very pleased with the work they performed for us at the recent Oakbrook Center Renovation project in Oakbrook, IL and we fully plan to consider them for all future fountain related work.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Wiitanen", written over a horizontal line.

Stephen Wiitanen  
Assistant Project Manager
