RE: Houdini Plaza
Project: 03-0975-002

Dear Bob,

Thank you for Fountain Technologies partnership with Hitchcock Design Group in designing and creating over 30 fountains in the past two decades, which includes the recently constructed Houdini Plaza waterfall!

Over the past 20 years, technology has changed dramatically. Yet as much as technology has changed, Fountain Technologies' first-rate, full service, fountain consultation and construction has not. We appreciate Fountain Technologies' breadth of knowledge and skill when comes to fountains and your ability to pay attention to all the details that go into making a fountain reality.

Fountain Technologies' expertise and knowledge of fountain controls and lighting was especially valuable in the design and construction of Houdini Plaza's waterfall. Not only does the waterfall look great, but your suggestion to use the same LED lights for the waterfall and entry tower was outstanding. This simple suggestion simplified the light controls, streamlined maintenance, and saved money.

We look forward to continuing our relationship with Fountain Technologies in designing and constructing many more fountains into the future. Thank you again for your hard work, expertise and dedication in creating great water features.
