RE: Muska Electric Co.  
Date: 7/5/06

Mr. Rhode:

This letter is to confirm the involvement of Muska Electric Co. for the building electrical work on the Stillwater Medical Expansion project in Stillwater, MN. The Expansion project consisted of 90,000 SF of Outpatient Clinical services including General Radiology/Imaging, Laboratory Services, Phlebotomy, PT/OT, Internal Medicine, Pediatrics, Family Practice, Clinical Administration and other Clinical Operational Services.

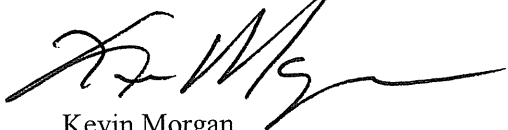

Muska Electric Co. teamed with Marshall Erdman and Associates to provide the buildings electrical power distribution, lighting, emergency power services, fire alarm systems and low voltage rough-in work. Muska Electric's subcontract for the work performed totaled in excess of \$990,000.00. This price excluded the cost of fixtures and gear that for this project were provided by others.

Muska's willingness to be an active partner involved in early project coordination, weekly project site meetings, project commissioning & training at turn over and their willingness to work constructively with our on site supervision and in house engineering made them an invaluable asset and large contributor to projects overall success. The project finished a month ahead of schedule, below budget and with a extremely high quality grading.

I look forward to any opportunity to work with Muska Electric Co. in the future and offer for them the highest of recommendations. Their office and field personnel always acted professionally and knew that Client Satisfaction was the overall objective.

If you have any questions, comments or concerns please feel free to call me at any time.
