Attn: K. Merrill

I had the opportunity to be the inspector of record for the project your company installed at 2600 University Ave SE in Minneapolis. The project's name is University Flats Condominiums.

Your permit, #BTMA 4061004, was for multiple installations of Skypack heating and cooling systems and related gas supply piping. The installer of the gas piping was your fitter Matt Hoffland.

Matt is to be commended for the job he did. Matt was always prompt, courteous, and professional in his communications, and, after 21 years of inspecting, I have never seen a more professional job of installing gas piping. All the horizontal pipe/tubing is straight, parallel or perpendicular to the building structure. All vertical piping is properly installed and supported. But even more important, Matt's installation of the gas piping in this building was so professional that I actually brought other inspectors to the site to show them Matt's job.

My job of inspecting new installations would be much easier and more enjoyable if more of the installers I encounter were of Matt's caliber.

Sincerely,

John J. Lampert  
Lead Inspector  
Heating and Refrigeration Systems
