Fauquier County Government and Public Schools
for Industrial Environmental Engineering Services

Project: LMACC2 Renovation of Buildings 3 and 5 at the
National Naval Medical Center, Bethesda, MD
Contract No.: N40080-10-D-0492 Task Order 0003

SUBJECT: Reference for Kynoch Environmental Management, Inc. (KEM)

To Whom It May Concern:

We have had the pleasure and privilege of working with Kynoch Environmental Management, Inc. (KEM) on numerous projects dating back to 1999. The John C. Grimberg Co., Inc. is a general and mechanical contractor with operations in the mid-Atlantic Region. We perform heavy industrial, public works, laboratory, school and administrative facility projects for federal, state and municipal agencies, as well as private work. We have had frequent occasion to retain and rely on KEM's services for those projects involving environmental management issues, whether part of our base contract work or unexpectedly arising during performance. KEM always provides us with thorough investigation and analysis of environmental issues and situations and provides carefully considered and cost-effective recommendations.

For example, on one of our current projects with the federal government at the National Naval Medical Center in Bethesda, Maryland, we encountered unforeseen mercury in building piping and in basement crawl space soil. We engaged KEM to assist in assessing the situation and provide recommendations for remediation on this time-sensitive issue. KEM quickly mobilized and conducted a thorough investigation including sampling and testing throughout the building. KEM provided a concise report presenting the results of the testing, analytical analysis and recommendations for remediation, which we are implementing at the direction of the government.

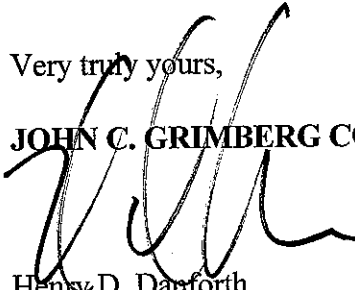

We have found KEM to be an experienced and qualified environmental engineering firm. They have always been responsive to our requests and the needs and requirements of the projects for which we retained their services. We have found the quality of their work and the timeliness of their services to be unparalleled.
