Re: LFG Mitigation Membrane and Horizontal Collector
WM DSTS Green Waste Enclosure

On behalf of ET Environmental and our mutual client, I would like to thank you and the High End Team for all of your efforts in helping use to achieve our goals regarding installation of the 36,000 square foot LFG Mitigation Membrane and venting system at the Davis St transfer station in San Leandro this past winter. From your initial insightful feedback on sketchy design information, refinement of parameters of the membrane application on our project, and through to responsive scheduling of the necessary resources, I would be pleased to provide a positive recommendation for you and your crew to perform future work, both for ET Environmental projects as well as to other firms that require this scope of work.

Thanks again.

Sincerely,
ET Environmental California, Inc.

Ben Etling
Senior Project Manager
