Re: Helicopter Operations Facility Project  
Joint Base Andrews, MD

Ms. Donna Arcidiacono  
President  
TIM Air Barrier Testing

Dear Donna,

The Haskell Company would like to thank you and your team for their exceptional work on the Helicopter Operations Facility project at Jt. Base Andrews, MD. Your team provided valuable insight into the project requirements, the air barrier system and their recommendations for a continuous air barrier system during construction.

Their knowledge, professionalism and organization were beneficial in getting this project to pass the whole building testing phase of the project.

Your team arrived as planned and worked diligently through the night performing the whole building air leakage testing, infrared thermography and diagnostics so as not to hold up the construction schedule.

We were impressed with their attention to detail and the timely turn around on all submittals.

Haskell looks forward to working with TMI® in the future.

Sincerely,

A handwritten signature in blue ink that reads "Jonathan Peters". The signature is fluid and cursive.

Jonathan Peters
