TMI Air Barrier Testing
709 Easton Rd., Suite 2A
Willow Grove, PA 19090
Attn: Donna Arcidiacono

Donna,

I wanted to take a moment to thank TMI for their dedication to the Berlin Library Project over the last 12 months. Throughout the project TMI provided valuable insight into the project requirements, the air barrier system and their recommendations for a continuous air barrier system. This involvement during the pre-planning and construction phase was instrumental to the success we experienced.

Throughout the project, your team was professional, organized, timely, and able to react and respond to any changes or additional requests that the project needed. We appreciate that TMI consistently arrived as scheduled and even worked late into the night performing the whole building air leakage testing, infrared thermography and diagnostics so as not to hold up the construction schedule.

Again, the Whiting-Turner team at the Berlin Library project was impressed with TMI's attention to detail, and we look forward to working with you in the future.

Thank you.

Adam Leonard
