Re: Master Plaster, Inc.
2116 N. Dixie Highway
Hollywood, Florida 33020

To Whom It May Concern:

I am pleased to write this letter on behalf of **Master Plaster, Inc.**, a family-owned drywall and plastering trade contractor who successfully completed one of the most challenging interior fit-up projects that we have ever been involved with, and located on the top two floors of the **CityPlace Tower**, in West Palm Beach, Florida.

The very progressive, organic design for the new 50,000 SF suite for **INTECH Janus** consisted of many curved walls and layer upon layer of soffits and floating elements. Only the right trade contractor having a great deal of ingenuity and expertise could have pulled off such a feat. Master Plaster responded to the call-to-action and for the right price, working collaboratively with the designer, the tenant and our firm. Their experience and commitment to quality earned them two well-deserved craftsmanship awards from Construction Association of South Florida. Furthermore, their efforts contributed toward our firm winning "Project of the Year" award among the hundreds of applicants that sought the same award 2010.

I am confident that you too will have an enjoyable experience in working with Mr. Noel Vargas and his entire team at Master Plaster, Inc.

Sincerely,

BALFOUR BEATTY CONSTRUCTION, LLC
