Re: Project by Stevens Construction Corp.

To Whom It May Concern:

We are civil engineering and land development firm. We have been involved with developing warehouse and office space in Virginia.

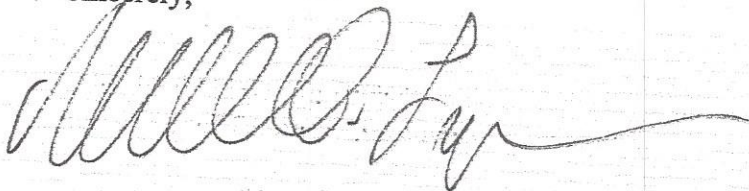

Stevens Construction Corp. has been our general contractor for several of these projects. The projects have been as follows:

1. Construct approx. 45,000 sq. ft of pre-engineered warehouse space including 3 acres of site work. Totaling \$1,500,000
2. Constructed office building. Totaling \$250,000
3. Built new home. Totaling \$625,000

Stevens Construction Corp. has completed all the projects within their time frame and has done a superior performance.

We would highly recommend them as a general contractor.

Sincerely,

Harold A. Logan, President
