Subject: Great Work

I would like to take a quick minute to commend you on the employees you have working on the Hot Water Boiler rehabilitation project at Richmond Tower. Your employees have maintained a extremely high level of professionalism. When mistakes happen, as they always do, they have work swiftly and effectively with corrective actions.

Your staff has made this difficult and stressful job much more palatable for the building tenets.

Thank you,

Brian L Sotdorus
Richmond Radar/ESU SSC Manager
