

# CANNONDESIGN

Roland G. Lemke, AIA  
Principal

May 27, 2010

To Whom It May Concern:

During the past 3 years, I have had the pleasure of working with ANF Group on the design and construction of multiple projects for Nova Southeastern University. The projects included a new Lower School and Performing and Visual Arts Center for the University School and a new Central Plant to serve the University.

ANF Group was brought on board the team during the Design Development phase to provide Pre-Construction Services. During this phase, they were very collaborative and provided thorough construction estimates that the team could use to make decisions. After this phase, ANF Group moved into providing Construction Management for the three facilities simultaneously. They staffed each facility with dedicated superintendents and project managers to assure complete coverage of the project. The ANF Group team was very adept at analyzing the stage of the project and providing the necessary leadership to the design team to expedite our ability to provide the information needed.

I would highly recommend working with both ANF Group and if you have any questions regarding their performance, please feel free to contact me.

Sincerely,

Roland Lemke, AIA LEED AP BD+C
